VSee AI Solutions

VSee modular digital health building block architecture gives IT teams the ability to quickly and securely deploy AI solutions throughout your health system.

Solution	Primary Function	Key Benefit	Use Case
AI Virtual Scribe	Converts patient-provider conversations into structured, accurate EHR documentation including SOAP notes with CPT codes	• Boost provider productivity • Document more accurately with less effort • Listen to patients without typing for increased patient satisfaction	Patient-provider encounters
Personalized AI Chatbot	Provides HIPAA-compliant closed Q&A responses based on specified organizational knowledge	Get secure, contextualized information trained only on desired content	Patient-facing customer support, internal staff inquiries and workflow guidance
AI Risk Adjustment	Analyzes patterns and trends in patient PHI for categorizing patients into risk groups and informing clinical decisions	Optimize resource allocation	Maternal mortality risk stratification
AI Telenursing	Remotely monitor patients with virtual-sensing cameras; automate prioritizing and assigning incidence alerts; provide asynchronous and synchronous nurse mentorship on demand	• Augment nurse capacity • Reduce manual monitoring and ensure patient safety • Increase nurse satisfaction	Telesitting (with fall detection, IV and extubation monitoring, virtual boundary alerts, etc.)
AI Rare and Complex Disease	Process 20M+ current medical journal papers to surface the most relevant research on patients' conditions	• Proactively design care plans for better health outcomes • Allow busy physicians to stay informed of the latest innovations and treatments for complex conditions	Evidence-based clinical decision making

Why VSee AI

- ✓ Customize to your clinical and organizational workflows
- ✓ Integrate with your existing EHR systems and other 3rd party applications
- ✓ Ensure security & HIPAA-compliance across all solutions
- ✓ Manage with a unified admin dashboard
- ✓ Gain ongoing AI model updates with new research

Learn how you can increase productivity and reduce administrative burden with VSee AI
